WHERE CHERISHED MEMORIES MEET NEW TRADITIONS

by Susan Shultz

School homecoming has been romanticized in television and movies for years- and for good reason. The spirit is high, alumni return to reconnect with old friends and make new ones, games are cheered on and more. Dances are often held and a queen and king are often elected by their peers. It is time to enjoy school pride and is a longtime fall tradition whether it is high school or college.

CONTINUE Homecoming ON PAGE 2

Homecoming FROM FRONT COVER

Homecoming week at Immaculate High School leads up to the Homecoming football game in Mustang Valley, where students, parents, alumni and friends gather to cheer on the Mustangs. Photo contributed by Immaculate High School.

A SPIRITUAL SPORTS MASS

Homecoming is one of the traditions Danbury's Immaculate High School students look forward to most each fall. The week brings together students, families, faculty and alumni and gives the entire school community a chance to celebrate what it means to be a Mustang.

One tradition that makes the season especially meaningful is Immaculate's Sports Mass. During the Mass, Chaplain Father Philip Phan blesses the equipment used by the school's athletic teams and prays for the student-athletes as they begin their season. It is a simple tradition, but one that reflects the role faith plays in everyday life at Immaculate.

School spirit also comes alive through themed days, a pep rally which includes "Color Wars" between the classes and The Stable, Immaculate's student fan section. Stable members turn out to support Mustang teams throughout the year and help create the kind of energy that makes Homecoming week feel special. The Homecoming Court, made up of seniors, is announced at the pep rally and is voted on by the graduating class.

"Immaculate High School is a special place. Homecoming has always been an exciting time for every Mustang," said alumnus Jon Fenaroli '87 who now comes to Mustang Valley to watch his senior son Albert Fenaroli play football. "We are fortunate and extremely grateful to be able to mark this great tradition with Albert and his team."

"My favorite part about Homecoming is honestly how connected everyone feels," said Olivia Scherer, a Stable leader from the Class of 2027. "There is so much school spirit, and I love seeing students from every grade come together, dress up, support each other and just have fun being part of the Immaculate community. It is one of those times where you really feel how close our school is."

The week leads up to the Homecoming football game in Mustang Valley, where students, parents, alumni and friends gather to cheer on the Mustangs. A new tradition that's grown the past four years is a Freshman Tailgate social followed by upperclassmen escorting them to the game for their first Homecoming experience. There's a Homecoming Dance the following night for all students. For alumni, it is also a chance to return to campus, reconnect with old friends and be part of the school community again. >>

Ultimately, homecoming at Immaculate is about connection—between students & alumni as well as between faith & athletics.

PEP RALLIES & GAMES

>> Homecoming is one of Stamford's King School's most beloved annual traditions, bringing together more than 1,000 students, families, alumni, faculty, and staff for a weekend celebrating Viking pride and community.

Festivities begin with a spirited student Pep Rally and continue on Saturday with a full day of athletic competitions, live performances by Middle and Upper School student bands, food, games, family activities, alumni gatherings, and reunions. Students from across the Lower, Middle, and Upper Schools take part, while alumni return to reconnect with former teachers and classmates and cheer on today's Vikings. The celebration continues on Sunday with King's annual 5K, extending the festivities for another fun and active community tradition.

"It's a really fun experience where you can hang out with friends and get to know new students," said Mia, Class of '31.

More than a celebration of school spirit, Homecoming connects generations of the King community. For current students, it is an opportunity to spend time with friends, make new memories, and feel part of something larger; for alumni, it is a chance to return to a place and community that helped shape them. Together, these traditions reinforce the sense of belonging that is foundational to the King experience and continues well beyond graduation.

"I've been at King since pre-K, and I'm in seventh grade now, so it's been a real tradition, and it's a lot about friendships and teamwork," said Romany, Class of '31. ●

FILM & MEDIA

STUDENTS EXPLORE NEW OPPORTUNITIES AT CT SCHOOLS

by Susan Shultz

With a robust arts scene, many local film festivals, theater companies and movies filmed here, Connecticut offers a plethora of ways to explore a future in film and media. Many schools are equipped with television studios, podcast studios and film studios of the highest caliber. There are also dozens of local student-led broadcast programs from news to sports and everything in between. In addition, students are also offered the chance to look beyond the camera and learn about film history. And CT's proximity to New York also offers the chance to find internships and connect with opportunities.

VISUAL STORYTELLING AT KING SCHOOL

At Stamford's King School, students learn to use visual storytelling to explore ideas, communicate what they have learned, and connect with audiences.

Through the Art & Design Department, students can pursue filmmaking as a semester major alongside offerings such as AV: Content Creation and Production, Digital Photography, and Publications: Design & Content.

Film Club provides another sustained extracurricular opportunity for students interested in media and production. Across these experiences, students move beyond simply consuming media to thinking critically about how stories are constructed and how images, sound, and other forms of media can shape an audience's understanding.

Students with a strong interest in the arts can also pursue a Certificate of Distinction in Art & Design, a specialized Upper School pathway recognizing sustained commitment and achievement in the arts. Students deepen their experience through advanced coursework, electives, and extracurricular involvement.

Media literacy and production also extend beyond the arts curriculum. In a recent AP U.S. History project, for example, students researched historical films, fact-checked key scenes, and produced podcasts examining the films' historical context and accuracy. Together, these opportunities help King students become thoughtful, creative, and critical visual storytellers. ●

MAKING A SCHOOL COMMUNITY ACCESSIBLE TO ALL WITH FINANCIAL AID & SCHOLARSHIPS

by Susan Shultz

In today's ever more expensive world, wallets are tighter, and everyday living is more expensive. For parents who want to give their children every opportunity but might struggle to pay, many Connecticut schools open their doors via financial aid and other options to make sure every child feels welcome. ››

AdobeStock

For over 45 years, the French-American School of New York has offered bilingual, international education from preschool through grade 12, with French-American and International Program options taught in both English and French.

The only school in the New York metro area accredited for both the IB and French Baccalaureate diplomas, FASNY welcomes a diverse community of students from 54+ nationalities.

MAKING A CATHOLIC EDUCATION AFFORDABLE

>> Catholic Academy of Stamford is committed to making a high-quality, faith-based Catholic education accessible to families regardless of financial circumstances.

Financial assistance opportunities is actively promoted and families who may need tuition support are encouraged to explore the resources available to them.

CAS supports families through tuition discounts, including a sibling discount for families enrolling more than one child and a parish discount for eligible families who are active members of a participating parish. These discounts help make a Catholic Academy education more affordable for families.

Families with students in Grades K-8 may also apply for need-based tuition assistance through the Bishop's Scholarship Fund, administered by Foundations in Education.

The application process utilizes FACTS to assess demonstrated financial need and provide assistance to qualifying families. CAS communicates application dates, deadlines and available resources to both current and prospective families and encourages families to apply as early as possible.

In addition to the Bishop's Scholarship Fund, other scholarship opportunities are available through Foundations in Education, including the Leaders of Tomorrow program.

Families are also encouraged to explore the Federal Scholarship Tax Credit, an additional initiative designed to help expand access to educational opportunities and make a Catholic education at CAS more attainable for families.

Together, CAS tuition discounts, need-based financial aid and scholarship opportunities provide families with several avenues for making Catholic education more affordable at CAS. By actively communicating these opportunities and connecting families with available financial resources, CAS works to ensure that financial need does not unnecessarily prevent a child from experiencing the academic excellence, faith formation and supportive community that define a Catholic Academy education.

OPENING DOORS, EMPOWERING HER POTENTIAL

For some families, choosing a high school is about finding the right academic fit. For others, it begins with a more fundamental question: Can we make it work?

At Lauralton Hall, the answer is often yes.

This past year, Lauralton awarded approximately $1.6 million in need-based financial aid and merit scholarships, helping 41% of students access a Lauralton education. Through an application and interview process, the merit scholarships recognize academic achievement, leadership, service, and students who embody the spirit of Mercy.

But supporting families is about more than numbers.

"We never want a family to assume that a Lauralton education is beyond their reach," says Yvonne Fosse-Previs '90, P'27, Director of Enrollment. "Our financial aid process is designed to be thoughtful, confidential, and responsive to the individual circumstances of each family."

DISCOVERY IN ACTION:
Snacks became scientific models as Chemistry students explored isotopes and atomic mass through hands-on learning.

The Power of Discovery

At King School, students ask big questions, explore ideas, and take ownership of their learning.

That's how engagement grows. That's how students fall in love with learning.

And those skills go far beyond the classroom.

They shape how children solve problems, adapt to change, and take on any challenge with confidence and purpose.

GLOBAL EXPERIENCES OFFER RICH CULTURE TO CT STUDENTS THROUGH EXCHANGE AND ABROAD PROGRAMMING

by Susan Shultz

While there is much to learn locally in Connecticut, expanding a student's horizons, literally, by studying from the perspective of other countries. These opportunities can arise from cultural exchange programs, travel, meeting other contemporaries, and more. First-hand life experiences can educate students in a different and holistic way and immerse them in the rich cultures around the world.

FOREIGN EXCHANGE & GLOBAL PROGRAMS

At King School, Global Education is woven throughout the PreK–Grade 12 experience, giving students opportunities to understand the world through curriculum, relationships, cultural exchange, and firsthand experiences.

King's international partnerships allow students to connect with peers across cultures, including exchanges with partner schools in France and Japan. Each year, several travel opportunities are offered for students in Grades 8–12, with destinations and programs changing from year to year.

"The relationships our students build are impressive and inspiring, especially given the language barriers and cultural differences," said Grade 8 teacher Ken Lewis.

Past experiences have taken King students to Costa Rica, Colombia, Japan, Switzerland, France, Spain, Greece, China, and Scotland, as well as

CONTINUE Foreign Exchange ON PAGE 12

Financial Aid FROM PAGE 7

That individualized approach matters because no two families look exactly alike. The Enrollment team works closely with families to understand their circumstances and help them navigate the financial aid and scholarship opportunities available to them.

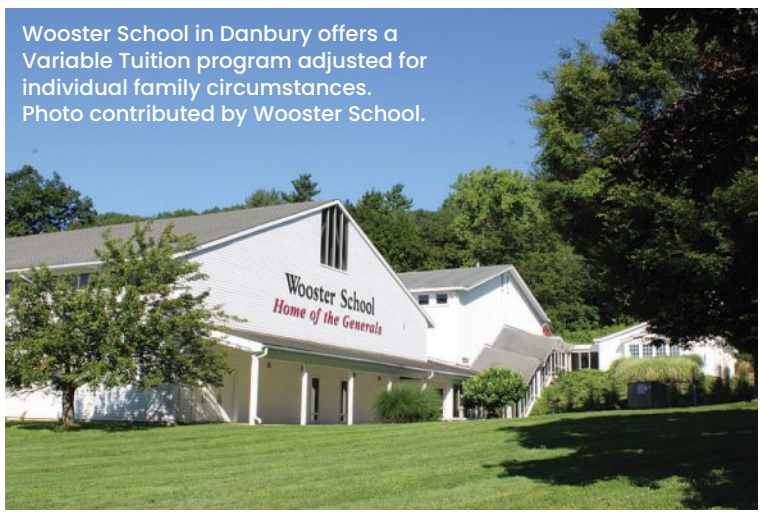

The result is a Lauralton community that reaches well beyond the school's Milford campus. Students come from more than 20 communities, bringing different experiences and perspectives while sharing a common desire to learn, grow, and become who they are meant to be.

For Lauralton, financial aid is more than assistance—it is an investment in young women and in the future they will shape. Because empowering her potential begins with opening the door.

A LONG-STANDING COMMITMENT AT WOOSTER SCHOOL

Wooster School in Danbury offers a Variable Tuition program adjusted for individual family circumstances. Photo contributed by Wooster School.

Wooster School (grades 5-12) in Danbury has a long-standing commitment to accessibility and socio-economic diversity since its founding in 1926. Through its Variable Tuition program, tuition is directly adjusted based on a family's unique financial picture—ensuring that a transformative, student-centered education is within reach for families across a wide range of economic backgrounds.

By taking into account factors like family size, household expenses, and local cost of living, Variable Tuition creates a transparent, straightforward path forward where every student can be known, challenged, and supported in a vibrant, inclusive community.

To learn more about Variable Tuition, register for Wooster's Open House on Saturday, Nov. 7.

CHESHIRE ACADEMY OFFERS FINANCIAL AID FOR EACH STUDENT'S STORY

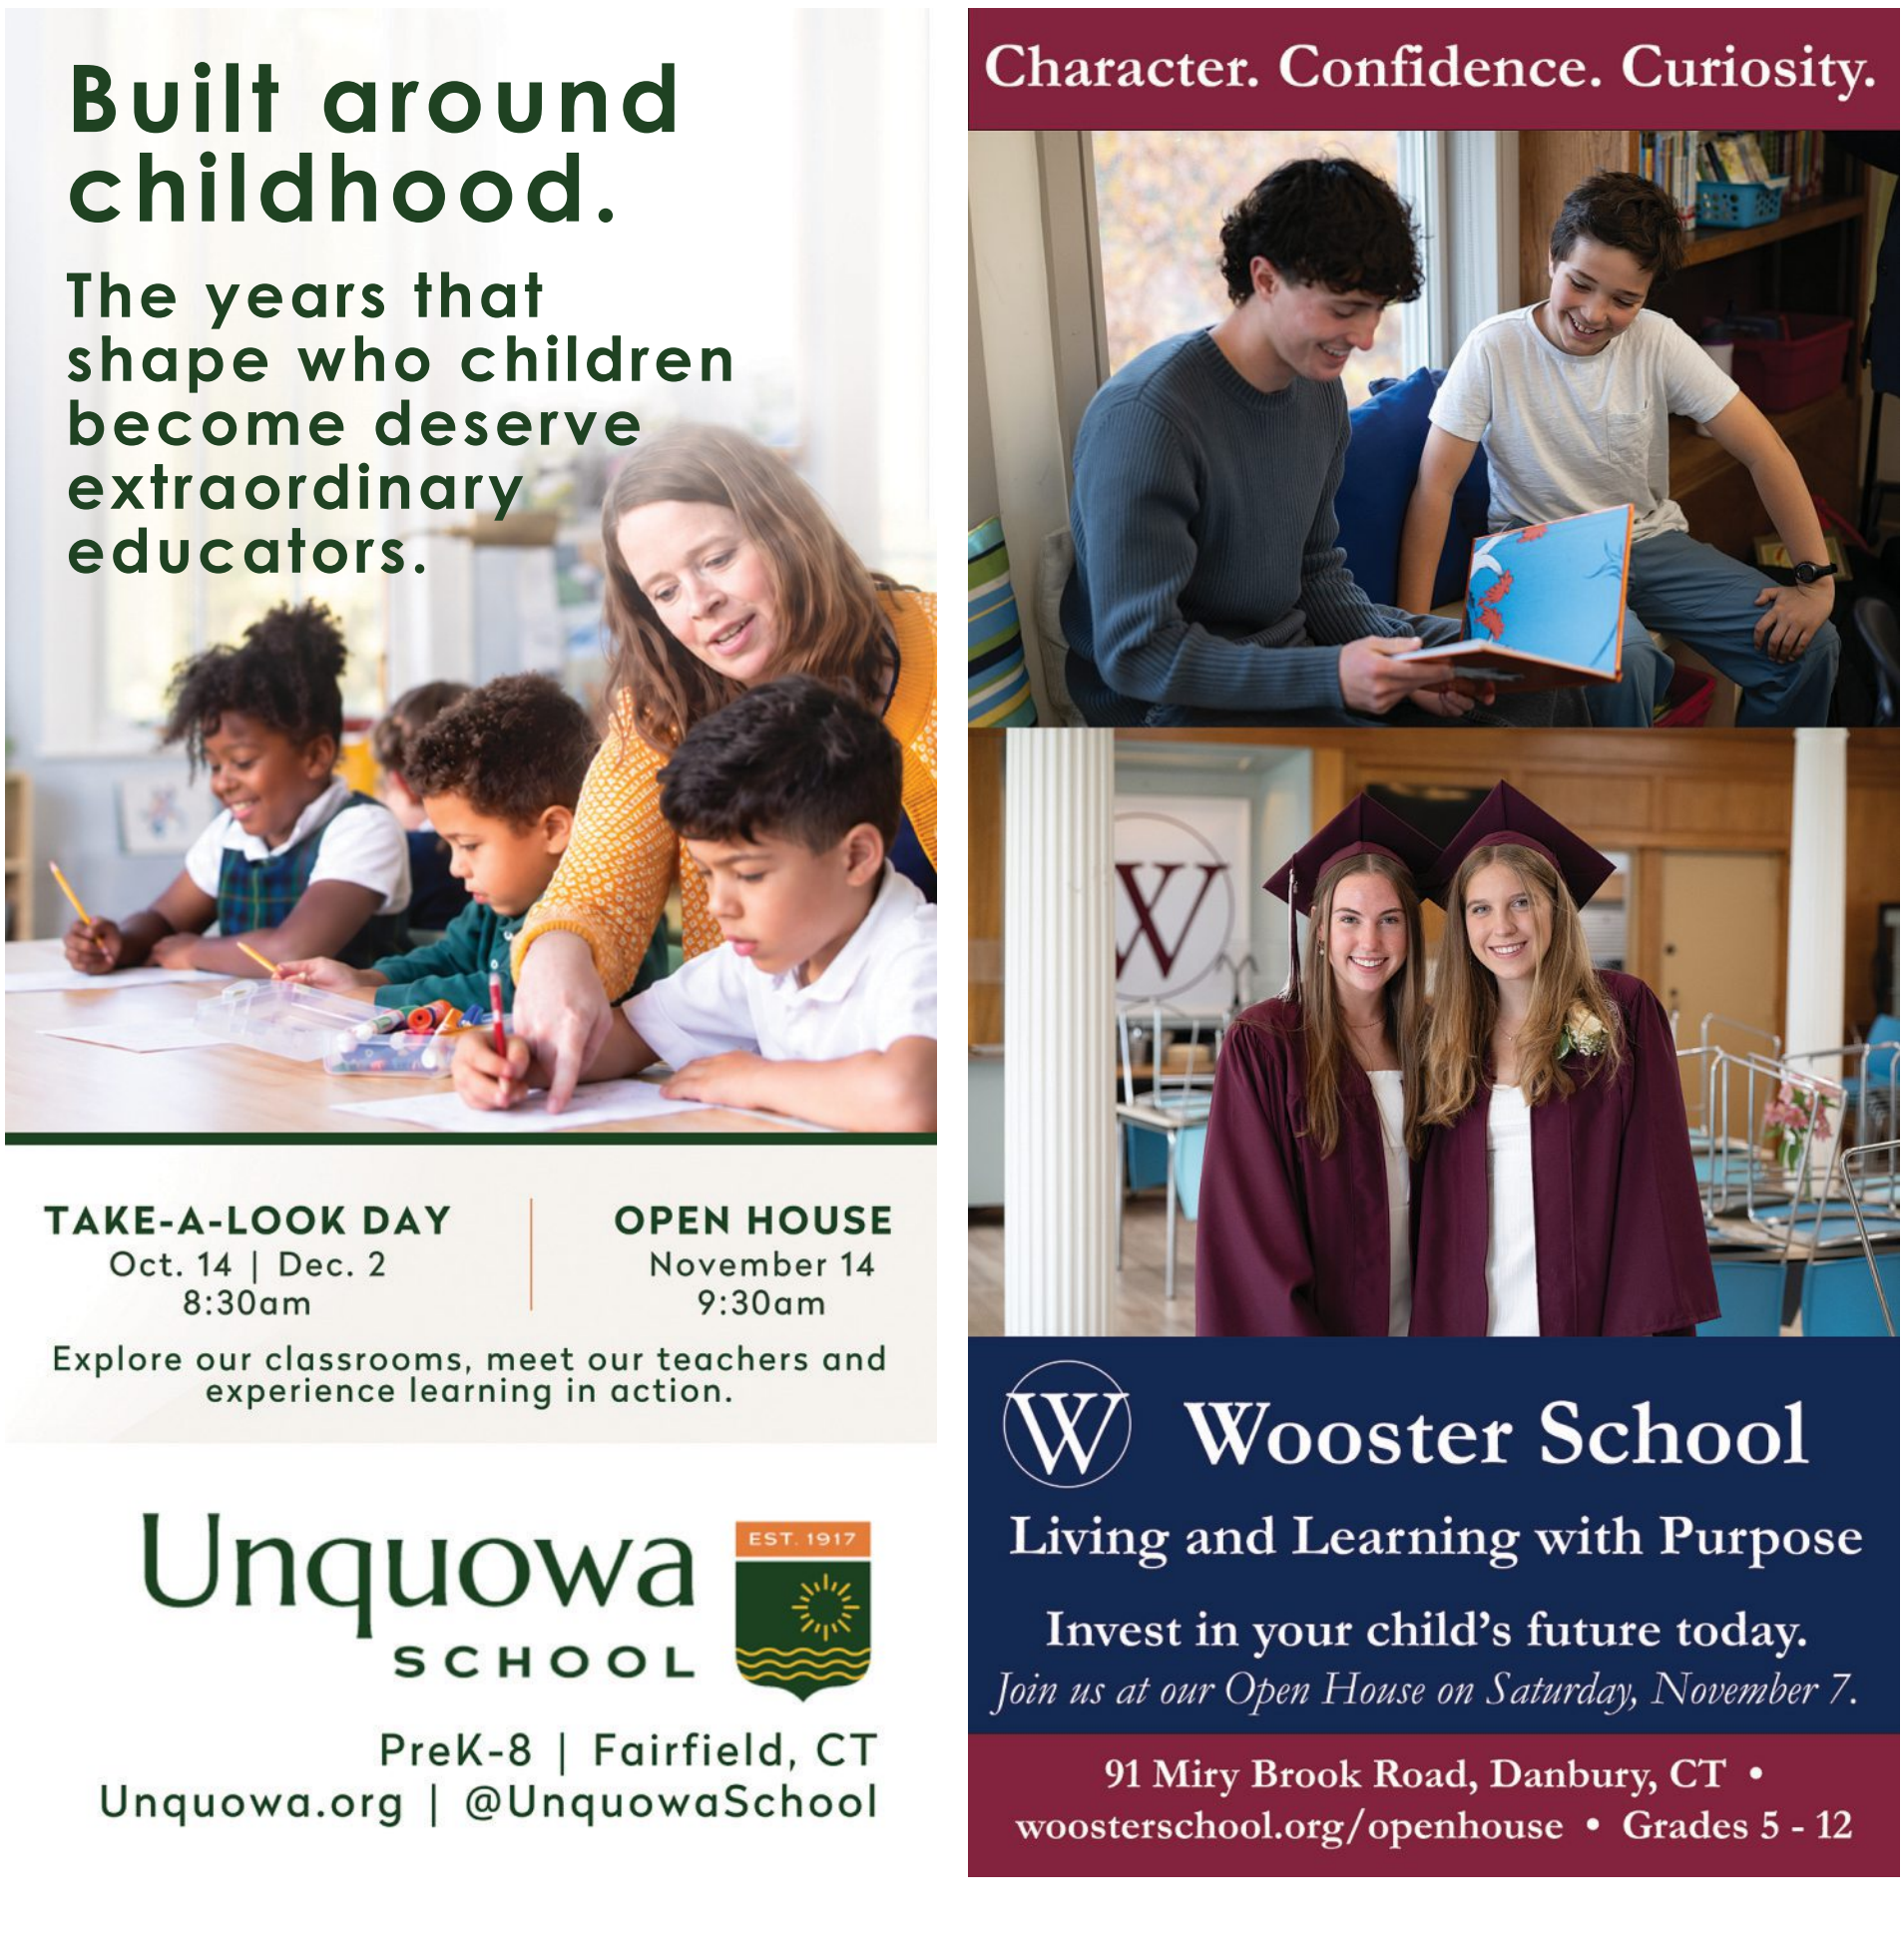

Cheshire Academy offers need-based financial aid to students to make the dream of a college preparatory education attainable and achievable to a wider range of students, increasing the diversity and caliber of the student body.

"We talk a lot about building purposeful global citizens at Cheshire Academy, but that begins with belonging and making sure talented students aren't shut out because of cost," said Sheryl Stearns, director of financial aid and senior associate director of admission.

"Fifty-five percent of our students are here on some form of financial aid, scholarship, or small merit award. Financial aid isn't an afterthought for us. It's one of the ways we live out our mission, and it's a big part of why our community is as diverse and talented as it is," she said.

For the 2026-27 academic year, Cheshire Academy awarded $6.1 million in financial aid with an average award of $27,099.

Through the generosity of The Clarence Manger and Audrey Cordero Plitt Trust, Plitt loans may be available to families who either did not qualify for financial aid or feel they need additional support to bridge the gap >>

>> between cost and their financial aid award.

These loans allow families to pay for tuition in regular monthly installments at competitive interest rates, over a five-year period after graduating from the Academy. Interest does not begin to accrue on loan principal until such time as the loan payments begin.

In addition, Cheshire Academy offers payment options that include a one- or two-installment payment plan or a monthly payment plan.

A variety of merit-based scholarships are available, including the Cheshire Town Scholarship. Originating in 1938, the Cheshire Academy Town Scholarship is open to students from the town of Cheshire applying for the 9th grade. The winner of this prestigious award receives a full, four-year scholarship to attend CA. Partial scholarships are offered to runner-up applicants.

The Alumni Legacy Scholarship is for children, grandchildren, and relatives of Cheshire Academy alumni. If awarded, families will receive $10,000 towards the total cost of a boarding tuition. This scholarship is also available to siblings of currently enrolled students entering grades 9 through 12 and postgraduate.

The Mi Corazón/Armando Simosa '08 Annual Scholarship provides financial aid to a new, full-time boarding student from Canada or South America who exhibits academic merit and financial need. The scholarship will be awarded to an incoming 10th-grade student and will remain with the same student through the 12th grade.

Cheshire Academy offers need-based financial aid to make education attainable and achievable to a wider range of students. Photo contributed by Cheshire Academy.

MAKING KING ACCESSIBLE THROUGH FINANCIAL ACCESS & SCHOLARSHIPS

King School in Stamford is committed to making a King education accessible to talented students and families from a wide range of economic backgrounds. Through its Financial Access program, King currently offsets tuition by more than $4 million, with approximately 21% of students attending with affordable tuition made possible through Financial Access. King uses a personalized assessment process that recognizes that every family's financial circumstances are different.

Community Enrichment Scholarships provide another pathway for admitted students whose families need financial support. These multi-year scholarships are made possible through tailored gifts from members of the King community and can support students whose talents, interests, or perspectives would add something distinctive to the school—as artists, athletes, scientists, or engaged community members.

The impact can extend far beyond tuition: access to a King education can allow students to discover new interests, build confidence, pursue opportunities they may not otherwise have encountered, and find a community where they can thrive. Together, Financial Access and Community Enrichment Scholarships help broaden who has the opportunity to be part of the King community. ●

destinations such as Amsterdam and Venice.

These programs extend classroom learning into the world through experiences such as studying science at CERN in Switzerland, exploring sustainability and cultural exchange in Japan, connecting with partner schools and homestay families in France, participating in service learning in Costa Rica, performing at the Fringe Festival in Scotland, and pursuing art-focused travel throughout Europe.

"Even though we lived in different countries (Colombia and the United States) and had different experiences, we were still able to play soccer for 10 hours a day. The bonding was incredible," said Upper School student Santi S.

Upper School students can further deepen this work through the Global Studies distinction program, undertaking interdisciplinary research and projects focused on issues of global significance. Whether students are collaborating with peers abroad, welcoming international perspectives into their classrooms, or traveling to experience another culture firsthand, King emphasizes curiosity, cultural understanding, and meaningful connections.

A NEW GLOBAL CITIZENSHIP EXCHANGE PROGRAM

Cheshire Academy recently announced an exciting opportunity for students who plan to try for the school's prestigious Global Citizenship (GC) Diploma Distinction: the chance to study abroad in Argentina.

In January, the school will welcome students from St. George's College, Quilmes, in Buenos Aires to the Cheshire campus. In turn, a few Cheshire Academy 10th graders will study at the Argentina school from September 18 through October 16, 2027.

Students selected must be candidates for the GC Diploma Distinction.

A companion to the highly regarded International Baccalaureate® Diploma (IB), this distinction is a concentration within the academic program for students interested in pursuing an education with greater focus on sustainability, service, leadership, and diversity, equity, inclusion, and justice (DEIJ).

"We intend to expand our GC Exchange Program to partner with schools all over the world in future years," said Nick Joaquin, the Mathematics & Computer Science Department co-chair who is also the Academy's GC coordinator.

In 2026, Cheshire Academy also reinstated its Spring Break travel option with a popular trip to Morocco, with an annual faculty-led excursion continuing in 2027 and beyond. ●

HEARST CONNECTICUT MEDIA GROUP

›› Recycling has been mandatory in Connecticut, including in schools, for many items and has been instituted since 1991, with additional materials added in 2012. Also, in 2024, CT passed a law which states if a school building (public, private, religious, charter or boarding school) generates more than 26 tons per year of food scraps (incl. cafeteria, culinary program, school kitchen) and is within 20 miles of an authorized composting facility, it is required to compost food scraps as of July 1, 2026. Some schools in the state have also changed from disposable to cutlery to washable to further reduce waste production.

AN ONGOING COMMITMENT

At King School in Stamford, sustainability is an ongoing commitment, with initiatives designed to reduce waste, conserve resources, and encourage environmental responsibility throughout the community.

Recycling bins are available in classrooms, workspaces, and common areas, while broader campus efforts include LED lighting, energy optimization, organic turf care, composting, recycling, and other waste-reduction initiatives.

Sustainability is also connected to student learning. Some Upper School students have conducted feasibility studies examining sustainable practices at King as part of their Global Studies work, giving them opportunities to apply classroom learning to real-world questions on their own campus.

Through both operational practices and academic exploration, King encourages students to think critically about environmental responsibility and their role in creating more sustainable communities. ●
